Priority Applications (No Type Date): GB 7629373 A 19760714

Abstract (Basic): GB 1494814 A

Agrochemical compsn. comprises an agricultural chemical and a film-forming polymer having  $\geq 1$  polyoxyethylene moiety per molecule, a soil fixivity of  $\geq 40\%$  and a water vapour permeability of 400-1500 g/m<sup>2</sup>/24 hr. Suitable agricultural chemicals include herbicides, insecticides, fungicides, nematocides, rodenticides, plant growth regulants, repellents or attractants.

A typical compsn. comprises 100 pts. urethane emulsion, 30 parts bromacil and 230 parts bentonite as pellets.
